ASSIGNMENT COVER SHEET

Subject Code: COS30008
Subject Title: Data Structures and Patterns
Assignment number and title: 4, Binary Search Trees & In-Order Traversal
Due date: May 25, 2021, 16:00
Lecturer: Dr. Markus Lumpe

Your name: Khang Trinh **Your student id:** 102118468

Check Tutorial	Wed 08:30	Wed 10:30	Wed 16:30	Thurs 08:30	Thurs 10:30	Thurs 14:30	Thurs 16:30	Fri 08:30	Fri 10:30	Fri 14:30
					X					

Marker's comments:

        }
        return true;
    }
};

template<typename S>
BNode<S> BNode<S>::NIL;
```

Output

```
Test BNode
insert of 25 as root.
insert of 10 succeeded.
insert of 15 succeeded.
insert of 37 succeeded.
insert of 10 failed.
insert of 30 succeeded.
insert of 65 succeeded.
Height of tree: 2
Delete BNode tree
Test BNode completed.
```

Problem 2

BinarySearchTree.h

```
// COS30008, Problem Set 4, 2021

#pragma once

#include "BNode.h"

template<typename T>
class BinarySearchTreeIterator;

template<typename T>
class BinarySearchTree
{
private:
    BNode<T>* fRoot;

public:

    using Iterator = BinarySearchTreeIterator<T>;

       BinarySearchTree() : fRoot(&BNode<T>::NIL) {
       }
       ~BinarySearchTree() {
              remove(NULL);
       }

       bool empty() const {
              return fRoot->empty();
       }

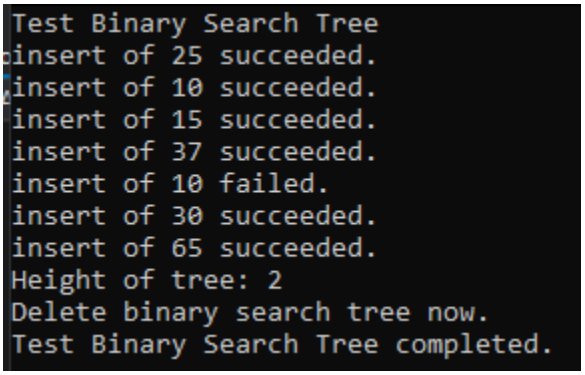
       bool insert(const T& aKey) {
              if (empty())
                     return fRoot = new BNode<T>(aKey);
              return fRoot->insert(aKey);
       }

       bool remove(const T& aKey) {
              return fRoot->remove(aKey, fRoot);
       }

       size_t height() const {
              return fRoot->height();
       }

       Iterator begin() const {
              return Iterator(const_cast<const BNode<T>*>(fRoot));
       }
       Iterator end() const {
              return Iterator(&BNode<T>::NIL);
       }
};
```

Output



Test Binary Search Tree
insert of 25 succeeded.
insert of 10 succeeded.
insert of 15 succeeded.
insert of 37 succeeded.
insert of 10 failed.
insert of 30 succeeded.
insert of 65 succeeded.
Height of tree: 2
Delete binary search tree now.
Test Binary Search Tree completed.

Problem 3
